Yes

Explain:

Do all hearing aid-compatible handsets that were certified only under ANSI C63.19-2007, but that the manufacturer also tested and found not to meet hearing aid compatibility requirements under ANSI C63.19-2011 for one or more operations that are not covered under ANSI C63.19-2007, include language informing users by clear and effective means that the handset does not meet the relevant rating or ratings with respect to such operation(s)?

N/A

Explain:

Do all handsets that are capable of use for Voice over LTE, and that were certified for inductive coupling capability under ANSI C63.19-2011 without being tested for inductive coupling capability over VoLTE, include language disclosing that they were not tested with respect to this operation?

N/A

Explain:

Do all handsets that meet the criteria for an M3 rating by allowing the user to reduce the maximum power for GSM operation in the 1900 MHz band include the required disclosure?

Explain:

### Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Service provider websites must include the levels of functionality that the service provider has defined, the level that each hearing aid-compatible model falls under, and an explanation of how the functionality of the handsets varies at the different levels.

No

Website address:

Explain: Company does not have a website

### Consumer Outreach

Describe consumer outreach efforts in the past 12 months: Compliant handset models are publicly identified for consumers and audiologists. Compliant models are listed on the i Wireless website, and its retail salespeople are trained to assist with compliant digital wireless phones. Compliant handsets are available for testing from live phone display in retail locations. Written materials, pamphlets and other promotional literature are provided at the point of sale and one website, addressing the needs of individuals with hearing disabilities. Consumers are given a 14-day trial period to try out digital wireless phones to determine whether they will work properly with their hearing aids.

### Methodology for Functionality Levels

Handset models are categorized by capabilities regarding features and functionalities. Basic handsets are entry level handsets that are offered at a low cost. Featured handsets are handsets with more advanced capabilities. Smartphones and PDAs are handsets that run complete operating system software as a platform for application developers.
